Fondazione Benetton Studi Ricerche. Information sheet

The Fondazione Benetton Studi Ricerche was founded in 1987.

Chairman: *Luciano Benetton*.

Director: *Marco Tamaro*.

Chairman of the Prize Jury: *Domenico Luciani*.

Main goals: study and research on landscape.

Long-term programmes are determined with the support of the Scientific Committee.

Activities focus mainly on the fields of documentation (library, map library, picture library, archives); study and research (projects, seminars, conferences, short courses);

experimentation (workshops); publications; educational projects for schools; cultural events (meetings for the general public, film projections, musical or literary events, exhibitions).

The International Carlo Scarpa Prize for Gardens, established in 1990, is a long-term project in which, every year, an international jury researches and designates a place of outstanding importance, which then becomes the focus of a scientific and awareness-raising campaign.
